

# Photon Emscripten Client SDK - Used Open Source Software

## Emscripten

URL: <https://emscripten.org/index.html> / <https://github.com/emscripten-core/emscripten>

### License

Emscripten has two licenses: MIT and University of Illinois/NCSA Open Source License as stated [here](#).

Emscripten is available under 2 licenses, the MIT license and the University of Illinois/NCSA Open Source License.

Both are permissive open source licenses, with little if any practical difference between them.

The reason for offering both is that (1) the MIT license is well-known, while (2) the University of Illinois/NCSA Open Source License allows Emscripten's code to be integrated upstream into LLVM, which uses that license, should the opportunity arise.

The full text of both licenses follows.

""""

The musl libc project is bundled in this repo, and it has the MIT license, see `system/lib/libc/musl/COPYRIGHT`

The `third_party/` subdirectory contains code with other licenses. None of it is used by default, but certain options use it (e.g., the optional closure compiler flag will run closure compiler from `third_party/`).
